

The Global Century™ fuel dispenser:  
Save space without sacrificing value.

## Save space without sacrificing value

Your forecourt can be a harsh place, constantly at the mercy of rough weather and even rougher customers. You need a fuel dispenser rugged enough to withstand the elements, adaptable enough to meet your specific site needs, and stylish enough to make a favorable impact on potential consumers.

Meet Dresser Wayne Pignone's Global Century fuel dispenser — proof that good things can come in small packages.

## Flexible, practical configurations

The compact Global Century dispenser is available in a wide range of configurations, including single and dual product, and island or lane. Choose from flow rates ranging from 40 to 130 litres per minute, making the Global Century dispenser ideal for both standard retail sites and high volume locations like airports, marinas and truck stops.

Ethanol, biodiesel and LPG models are also available to allow you to better serve your customers' fuel needs.

- Configurations include single and dual product, island and lane.
- Flow rates from 40-130 lpm serve both standard and high volume sites.
- Models available for ethanol, biodiesel and LPG.

## Attractive, customer-focused design

With its attractive smooth-finish bezel and clean, modern appearance, the Global Century dispenser complements any forecourt. But your customers won't just like its look — they'll rave about its user-focused functionality.

The large product IDs and easy-to-read backlit LCD sales and volume display help minimize consumer errors and indecision. And the lift-to-start nozzle, optional extra-long fuel hose reach (up to 4.5 meters) and optional keypad will allow them to spend less time at the pump and more time on the road.

- Attractive bezel enhances any forecourt.
- Large product IDs and backlit sales/volume display facilitate customer interaction.
- Lift-to-start nozzle and optional hose reach (up to 4.5 meters) improve customer fuelling experience.

## Durable, reliable construction

Because non-functional dispensers mean a non-functional site, the Global Century dispenser features only time-tested, field-proven components. The rugged, compact pumping unit contains no pipe connections to minimize the risk of leaks. The high performance pump meter – iMeter™ also utilizes “plug-in” pump connections and a seamless, integrated pulser to minimize leakage and increase accuracy. The modular iGEM™ electronics efficiently manage pump operation and securely transmit data to any in-store payment system.

Routine inspections and maintenance are easy, thanks to the dispenser's sturdy but easily removable doors. And all of its hydraulics, electronics and meter utilize Dresser Wayne Genuine Parts to help ensure years of efficient, hassle-free operation. That translates into more dispenser uptime and fewer service calls — as well as exemplary long-term support and pain-free upgrades. Listening to its customers' business needs, Dresser Wayne Pignone is using global components in all Global Century dispensers to minimize ongoing service costs by limiting the number of spare parts.

- Accurate iMeter features easy one-step electronic calibration.
- Modular iGEM electronics offer secure, versatile functionality.
- “plug-in” connections minimize leaks.
- Easy-access interior makes maintenance easy.
- Global components to minimize ongoing service costs.

## About Dresser Wayne/Dresser Wayne Pignone

With offices on five continents, manufacturing facilities on four and thousands of employees worldwide, Dresser Wayne has unquestionably helped shape the evolution of retail fuelling since its modest origin in 1890. Known for its cutting-edge technologies, exceptional customer focus and its win-win industry partnerships, it has become a leading supplier of integrated solutions to the global retail petroleum industry. Wayne® fuel dispensers, point-of-sale systems and after-sale support services set the standard in this dynamic, highly competitive market.

To better serve the needs of the EMEA market, Dresser Wayne acquired certain business assets of Nuovo Pignone in 2004. The resulting Europe-focused brand, Dresser Wayne Pignone, is based in Malmö, Sweden. Thanks in part to that focus, Dresser Wayne is the only supplier able to provide a truly integrated product line to EMEA fuel retailers that encompasses all fuel types: petrol, LPG, CNG and a variety of eco-fuels.
